The screenshot shows a user interface for agreeing to a user agreement. The title bar reads 'Equipment Access Control User Agreement'. The main content area has an orange background and displays a 'User Agreement' document. The document is heavily redacted with black scribbles. Below the document is a checkbox followed by the text 'By clicking this button, I agree to the User Agreement'. At the bottom are 'Back' and 'Next' navigation buttons.

Equipment Access Control Help

The window has a title bar with icons for back, forward, close, and home, along with a search bar and a magnifying glass icon. The main content area is titled 'Help' and contains text about the equipment access control system. It also includes safety instructions for using a soldering iron and ends with a note to clean up the workbench.

Help

The Equipment Access Control is a secure and user-friendly app/web interface for controlling access to any amount of equipment.

Select the equipment you wish to use and the time you need it. When equipment is not in use it will remain off to protect the equipment from power failures or hacking attempts. Administrators are able to provide and deny access to any equipment for any user based on user access.

Never touch the element of the soldering iron...400°C!
Hold wires to be heated with tweezers or clamps.
Always return the soldering iron to its stand when not in use. Never put it down on the workbench.
Turn unit off and unplug when not in use.
Immediate place any burns under cold water for 15 minutes.
Report to a first aider if deep or extensive otherwise protect with a plaster (band-aid).

Make sure to clean up your workbench when you're finished!
